Question 1

You are evaluating criteria for choosing the solver to support planning for a complex supply chain. What are some of the points that should be reviewed? Note: There are 2 correct answers to this question.

- A. Push and Pull production models are used by the optimizer.
- B. Prioritization of demand elements one by one is achieved by unconstrained heuristics.
- C. Planning results can be generated faster by the optimizer.
- D. Finite heuristics works with demand prioritization

Answer A D

Question 2

Which sourcing methods are required to identify the product flow through the network in SAP IBP for sales and operations? Note: There are 3 correct answers to this question

- A. Sourcing via Demand Prioritization
- B. Customer Sourcing Rule
- C. Sourcing via Production
- D. Unspecified Sourcing
- E. Sourcing via Costs

Answer B C D

Question 3

You set up lime-series integration using SAP Cloud Integration for data services. During the integration process of master data, an error occurred. In the Data Integration app the job failed with the status "Fatal Error". How can you find more details about the error?

- A. Download the Initial Problem Report in the Data Integration app.
- B. Download the Rejection Report in the Data Integration app
- C. Navigate to the Master Data Workbook in Excel and open the Log
- D. Navigate to the Manage Master Data app and open the Log.

Answer B

Question 4

Which SAP IBP planning operator can be run to delete planning objects in a certain version?

- A. Purge Master Data
- B. Purge Key Figure Data Outside Planning Area Planning Horizon
- C. Purge Key Figure Data
- D. Purge Non-Confirming Data

Answer C

Question 5

You created a key figure and want to add calculations. Which of the following rules do you consider? Note. There are 2 correct answers to this question.

- A. Aggregation calculations using SUM or MAX functions must be based on a higher aggregation level.
- B. The calculation chain for a key figure must always result in a calculated key figure.
- C. All key figure calculations have calculation inputs, which can be marked as stored or calculated.
- D. Key figures can be calculated across different planning levels

Answer C D
